PROFILE

I'm a junior javascript developer with a keen interest in UI design, databases, data visualisation, accessibility, artificial intelligence, open source and tech for good.

A self-motivated learner, I'm looking to work somewhere I can continue to develop my skillset, and hoping to join an organisation that uses technology to make the world a better place.

MENTOR - DATABASE WEEK & YA WORKSHOP | 2018

Full Stack Javascript bootcamp with an emphasis on Test Driven Development, accessibility, pair-programming, agile methodologies, design thinking and tech for good.

Each week of learning culminated in a group project. The details of some of these can be found below. Other group and solo projects can be viewed on my GitHub profile.

PROJECTS

LAMBETH LARDER

GROUP PROJECT WITH EXTERNAL CLIENT | FEB 2018

STACK: **NODE, EXPRESS, REACT, REACT-LEAFLET**

A micro-site for the charity Lambeth Larder that contains emergency food information for people in Lambeth.

My contributions included setting up React-Leaflet with custom designed pins that populated with the appropriate emergency food locations depending upon the search criteria, and making sure the site was responsive and worked well on Chrome in mobile and desktop views using styled components.

UPSHOP

GROUP STUDENT PROJECT | JAN 2018

STACK: **NODE, EXPRESS, HANDLEBARS, LEAFLET, POSTGRESQL, SCSS**

An app that allows users to search for businesses that reflect their values.

My contributions included database queries, database tests and rendering search results to the page using Handlebars & SCSS.
