PROFILE

I'm a junior javascript developer with a keen interest in UI design, databases, data visualisation, accessibility, artificial intelligence, open source and tech for good.

A self-motivated learner, I'm looking to work somewhere I can continue to develop my skillset, and hope to join an organisation that uses technology to make the world a better place.

PROJECTS

UPSHOP - github.com/DevGrrrl/upShop

An app that allows users to search for businesses that reflect their values.

Stack: Node, Express, Handlebars, PostgreSQL, SCSS.

LAMBETH LARDER - github.com/caralemony/lambeth-larder

A micro-site that contains emergency food information for people in Lambeth.

Stack: Node, Express, React, React-Leaflet.

EDUCATION

FOUNDERS & CODERS OCTOBER 2017 - PRESENT

Full Stack Javascript Bootcamp with an emphasis on TDD, accessibility, pair-programming, agile methodologies, design thinking and tech for good.
