alexisjaynedefoe@gmail.com

PROFILE

I'm a junior javascript developer with a keen interest in accesibility, UI design, data visualisation, artificial intelligence, open source and tech for good.

A self-motivated learner, I'm looking to work somewhere I can continue to develop my skillset, and hope to join an organisation that uses technology to make the world a better place.

PROJECTS

UPSHOP - github.com/DevGrrrl/upShop

An app that allows users to search for businesses that reflect their value, as well as contribute to the upShop community by adding businesses.

Stack: Node, Express, Handlebars, PostgreSQL, SCSS.

LAMBETH LARDER - github.com/fac-12/lambeth-larder

A micro-site that contains emergency food information, plus local help and support (advice centres, money management and digital support).

Stack: Node, Express, React, PostgreSQL.

EXPERIENCE

FOUNDERS & CODERS   OCTOBER 2017 - PRESENT

Full Stack Javascript Bootcamp with an emphasis on TDD, accessibility, pair-programming, agile methodologies, design thinking and tech for good.
